Inspection & Testing

CPP20521 Certificate II in Fire Protection Inspection and Testing

CPP20521 Certificate II in Fire Protection Inspection and Testing

Thank you for your interest in pursuing training with Axiom Compliance Learning. We are pleased to offer the Certificate II in Fire Protection Inspection and Testing course

This course is for individuals pursuing the FPAS Qualified Accreditation test and Inspect and/or applying for Fire Safety Assessment Qualified Accreditation Pathway I with the minimum entry-level Certificate II.

Our course is designed to equip you with the necessary skills and knowledge to succeed in this field, and we look forward to supporting you throughout your training journey.

STANDARD UNITS COMPLETED IN CERTIFICATE II

Compulsory Core units

BSBOPS203	Deliver a service to customers
BSBPEF202	Plan and apply time management
CPPCMN2002	Participate in workplace safety arrangements
CPPFES2004	Identify and report on types of installed fire safety equipment & systems
CPPFES2005	Demonstrate first attack firefighting equipment
CPPFES2006	Prepare for installation and servicing operations
CPPFES2007	Maintain quality of work and promote continuous improvement

Elective Units of Competency

CPPFES2003	Safely move loads and dangerous goods
CPPFES2010	Inspect and test fire hose reels
CPPFES2011	Install portable fire extinguishers, fire cabinets and fire blankets
CPPFES2020	Conduct routine inspection and testing of fire extinguishers & fire blankets
CPPFES2026	Inspect and test emergency and exit lighting systems
CPPFES2035	Identify, inspect and test fire and smoke doors

LICENSING/REGULATORY INFORMATION

In this field, it is crucial for all work to adhere to applicable legislation and industry standards. It's worth noting that certain installation, replacement, maintenance, and repair functions may only be performed by licensed trades or occupations and not by technicians. Regulatory mechanisms differ between states and territories, so students should confirm any regulatory limitations that may apply to this qualification in their specific location. By staying informed about regulatory requirements and industry standards, technicians can ensure that they provide the best possible service while also complying with regulations and promoting safety.

TRAINING RECOGNITION

The training units provided by Axiom Compliance Learning are nationally accredited and follow the national vocational education and training standards regulated by the Australian Skills Quality Authority (ASQA). This means that employers, industry bodies, licensing, and other relevant organisations throughout Australia recognise the quality of the training. When learners successfully complete a nationally accredited training course, they are awarded a nationally recognised qualification or statement of attainment that confirms their competency in a specific field of study.

COMPUTER SKILLS

Students need to be able to use common office programs such as Microsoft Word, Excel and Web browsers.

CPP20521 Certificate II in Fire Protection Inspection and Testing

PROGRAM OUTLINE

Blended learning (also known as hybrid learning) is a method of teaching that integrates technology online learning with traditional instructor-led face-to-face classroom activities with on-the-job tasks. The course has options of face-to-face and online or virtual classroom and online.

FACE-TO-FACE TRAINING, The course is delivered in a four-full-day block. To ensure the quality of training, the number of participants in each course is limited to 12. Sydney - Pemulwuy, Newcastle-Lambton, Byron Bay, Melbourne.

Or

VIRTUAL CLASSROOM, Four-day block Virtual (online with a live trainer).

A virtual classroom is a digital platform designed for learning that employs a delivery format such as Zoom. Here, a live trainer facilitates online training sessions, focusing on critical course content and guiding students on how to navigate through the program. This medium enables real-time engagement through audio and video communication, allowing trainers to interact with their students as they participate in learning and assessment activities.

ONLINE LEARNING

In addition to the live sessions, this program provides self-paced online learning, where students research, prepare and submit their assessments via the Learning Management System (LMS). Students will undertake personal study and develop fire system assessments using templates and available resources based on genuine work performances for evaluation purposes. Students' tasks require them to develop various documents, and service reports, with outcomes commonly found in the industry.

Students will complete knowledge tests at different intervals corresponding to the covered subjects. To research the answers, students can refer to the course training materials, notes, and other relevant references. The training is structured in a logical sequence to enable a step-by-step learning process. The activities are presented in a clear manner. They are directly linked to the course and industry information, allowing assessors to ascertain that students can competently apply their knowledge and skills.

The duration of the course is flexible, with students having up to 6 months to complete it. The more time students dedicate to the online learning component, the faster they can work through the content and assessment tasks.

Some of the required work performance evidence to complete this course is as follows:

- Ten fire extinguishers, including at least one of each of the following-
Water, Dry chemical, Carbon Dioxide, Wet Chemical, and Foam.
- Five fire blankets across two separate buildings.
- Twenty fire hose reels across a minimum of five different sites including at least five fire hose reels installed in a recess, cupboard or cabinet.
- Twenty fire and smoke doors across two different sites.
- Thirty single-point emergency escape light fittings or exit signs across at least five different sites.

COURSE FEE

\$2450 excl. GST on accredited training

To enrol go to axiomcompliancelearning.com.au choose training dates, choose the preferred date and enrol or call our team we can complete your enrolment over the phone.

AFTER ENROLMENT

- After enrolling online, we will contact the student to discuss their suitability for training.
- Enrolment confirmation will be emailed, including the invoice.
- Following the receipt of payment, we email the login details to start your course with the online component.
- When students have logged into our online learning platform, they can access course documentation, instructions, templates & resources; students are ready to begin the course.
- Students will receive a Zoom link via email for the virtual classroom before the training.

To assist students in their learning journey, Axiom Compliance Learning offers the expertise of highly skilled and motivated trainers and assessors with current industry experience. These professionals create an interactive, engaging, and supportive learning environment to facilitate learning. Additionally, the student management team, is readily available to assist with questions and offer support with online course work, ensuring that students receive the necessary guidance to succeed in their studies.

CPD points required by FPAS-accredited practitioners can be achieved through this training.

STUDENT INFORMATION

We offer an in-depth Student Handbook, which is provided along with your enrolment confirmation, that includes essential information.

Before enrolling, you can access the handbook on our website to review important details about your rights and responsibilities, including but not limited to your entitlement to privacy, a secure training environment, and the ability to file a complaint or appeal an assessment decision. We encourage all students to take advantage of the opportunity to review this essential information carefully.

For any further assistance, call; we're here to help.
