CPP20521 Certificate II in Fire Protection Inspection and Testing

Including units for Hydrant and hose reel 'test and inspect' registration

Thank you for considering Axiom Compliance Learning for your training needs. This Certificate II in Fire Protection Inspection and Testing is a unique opportunity for Fire Protection Technicians. This course is designed for individuals seeking certification as fire protection technicians responsible for the inspection and testing of fire extinguishers, fire blankets, emergency and exit lighting, fire and smoke doors and to fulfil the requirements for the registration of restricted plumbing work in "Hydrant and hose reel 'test and inspect'" making it comprehensive and valuable training for professionals in this field.

Our course is not just about theoretical knowledge. It's about developing practical competencies that are directly applicable to your work. This means you'll be equipped with the skills you need to excel in your role.

LICENSING/REGULATORY INFORMATION

All work must adhere to applicable legislation and industry standards in this field. It's worth noting that certain installation, replacement, maintenance, and repair functions may only be performed by licensed trades or occupations and not by technicians. Regulatory mechanisms differ between states and territories, so students should confirm any regulatory limitations that may apply in their specific location. By staying informed about regulatory requirements and industry standards, technicians can ensure that they provide the best possible service while also complying with regulations and promoting safety.

UNITS COVERED

BSBOPS203	Deliver a service to customers
BSBPEF202	Plan and apply time management
CPPCMN2002	Participate in workplace safety arrangements
CPPFES2004	Identify and report on types of installed fire safety equipment and systems

CPPFES2020	Conduct routine inspection and testing of fire extinguishers and fire blankets
CPPFES2026	Inspect and test emergency and exit lighting systems
CPPFES2035	Identify, inspect and test fire and smoke doors
CPPFES2037	Inspect and test fire hydrant systems

These 13 units are the current release 1.

TRAINING RECOGNITION

The training units provided by Axiom Compliance Learning are nationally accredited and in accordance with the national vocational education and training standards regulated by the Australian Skills Quality Authority (ASQA). This means that employers, industry bodies, licensing, and other relevant organisations throughout Australia, recognise the quality of the training. When learners successfully complete a nationally accredited training course, they are awarded a nationally recognised Full Qualification that confirms their competency in a specific field of study.

PROGRAM OUTLINE

Blended Learning (also known as hybrid learning) is a teaching method that integrates technology-based online learning with traditional instructor-led face-to-face classroom activities and practical tasks.

FACE-TO-FACE TRAINING

The course is delivered in one 5-day block.

To ensure the quality of the training, the number of participants in each course is limited to 8.

Or

VIRTUAL CLASS ROOM (online with a live trainer). Four-day block plus an additional single day.

A virtual classroom is a digital platform designed for learning that employs a delivery format such as Zoom. Here, a live trainer facilitates online training sessions, focusing on critical course content and guiding students on how to navigate through the program. This medium enables real-time engagement through audio and video communication, allowing trainers to interact with their students as they participate in learning and assessment activities. 9 am to 3 pm

ONLINE LEARNING

Online learning is completed in and out of the course, where students research, prepare and submit their assessments via the Learning Management System (LMS). Students will research, develop procedures, and employ templates with the available resources based on genuine work performances for evaluation purposes. Students will complete interactive online quizzes corresponding to the covered subjects. To research the answers, students can refer to the course training materials, notes & other relevant references.

PRACTICAL TASKS

Students' practical tasks require them to develop various documents, service reports, and outcomes found in the industry. Tasks will be performed in the course in front of the trainer/assessor and in the workplace. The training is structured logically to enable a step-by-step learning process. The activities are presented clearly. They are directly linked to the course and industry information, allowing assessors to ascertain that students can competently apply their knowledge and skills. The course duration is flexible, with students having up to 12 months to complete workplace tasks.

To assist students in their learning journey, Axiom Compliance Learning offers the expertise of highly skilled and motivated trainers and assessors with current industry experience. These professionals create an interactive, engaging, and supportive learning environment to facilitate learning. Additionally, the student management team is readily available to assist with questions and offer support with online coursework, ensuring that students receive the necessary guidance to succeed in their studies.

Some of the required work performance evidence to complete this course is as follows

Twenty fire hose reel inspections across a minimum of five different sites, including at least five inspections of hose reels installed in recess cupboards or cabinet

Fifteen Hydrant systems across a minimum of 10 sites

Ten fire extinguishers, including at least one of each of the following- water, dry chemical, carbon dioxide, wet chemicals and foam.

Five fire blankets across 2 separate buildings

Twenty fire and smoke doors over two different sites

Thirty single-point emergency light fittings or exit signs over five different sites

Please note that some work performance tasks are covered in the face-to-face training.

COMPUTER SKILLS

Students need to be able to use common office programs such as Microsoft Word, Excel and Web browsers.

COURSE FEE (Covered by subsidy)

\$2950 excl. no GST on accredited training

SUBSIDISED TRAINING South Australia

If you meet the eligibility and entitlement criteria, you can access a subsidised training place, which will cover the full course fee.

TRAINEESHIP

A traineeship is a structured learning program in which a trainee or apprentice undertakes paid employment in a vocation or trade to achieve a recognised qualification. The employer provides training and work relevant to the trade or declared vocation. Training providers deliver off-the-job training and issue relevant qualifications.

CPP20521 Certificate II in Fire Protection Inspection and Testing requires a traineeship training plan. This can be achieved with an existing or new employee.

Who can be a trainee

- School-Based Students
- An existing employee
- A new employee
- A mature-age student

The training contract agreement will detail the training provider and the qualification.

The Apprenticeship Network Provider (ANP) will facilitate the establishment of the training contract – for both apprenticeships and traineeships, they are experts at getting you started.
