

Fire Protection Inspection & Testing

CPPFES2020 Conduct routine inspection and testing of fire extinguishers and fire blankets

CPPFES2020 Conduct routine inspection and testing of fire extinguishers and fire blankets

Thank you for your interest in pursuing training with Axiom Compliance Learning. We are pleased to offer CPPFES202 Conduct routine inspection and testing of fire extinguishers and fire blankets (Release 1). Our course is designed to equip you with the necessary skills and knowledge to conduct routine monthly, six-monthly and yearly inspections and testing of fire extinguishers and fire blankets in accordance with relevant Codes and Australian standards.

It's worth noting that this course is recognised as one of the competencies required for applying for the FPAS Qualified Accreditation test and Inspect, as well as the Fire Safety Assessment Qualified Accreditation.

We look forward to supporting you throughout your training journey.

LICENSING/REGULATORY INFORMATION

In this field, it is crucial for all work to adhere to applicable legislation and industry standards. It's worth noting that certain installation, replacement, maintenance, and repair functions may only be performed by licensed trades or occupations and not by technicians. Regulatory mechanisms differ between states and territories, so students should confirm any regulatory limitations that may apply to this qualification in their specific location.

By staying informed about regulatory requirements and industry standards, technicians can ensure that they provide the best possible service while also complying with regulations and promoting safety.

TRAINING RECOGNITION

The training units provided by Axiom Compliance Learning are national accreditation and are in accordance with the national vocational education and training standards regulated by the Australian Skills Quality Authority (ASQA). This means that employers, industry bodies, licensing, and other relevant organisations throughout Australia recognise the quality of the training. When learners successfully complete a nationally accredited training course, they are awarded a nationally recognised qualification or statement of attainment that confirms their competency in a specific field of study.

PROGRAM OUTLINE

Blended Learning - (also known as hybrid learning) is a method of teaching that integrates technology online learning with traditional instructor-led face-to-face classroom activities with on-the-job tasks. 3 month course.

FACE-TO-FACE TRAINING

The course is delivered in one-day. To ensure the quality of the training, the number of participants in each course is limited. 8am to 4pm

Or

VIRTUAL CLASSROOM (online with a live trainer) one day. 9am to 3pm

A virtual classroom is a digital platform designed for learning that employs a delivery format such as Zoom. Here, a live trainer facilitates online training sessions, focusing on critical course content and guiding students on how to navigate through the program. In addition, this medium enables real-time engagement through audio and video communication, allowing trainers to interact with their students as they participate in learning and assessment activities.

CPPFES2020 Conduct routine inspection and testing of fire extinguishers and fire blankets

ONLINE LEARNING

In addition to face-to-face or virtual classroom, this program requires a portion of self-paced online learning, where students research, prepare and submit their assessments via our Learning Management System (LMS), Moodle. Students will research online, develop procedures, and employ templates with the available resources based on genuine work performances for evaluation purposes. Students will complete knowledge tests at different intervals corresponding to the covered subjects. To research the answers, students can refer to the course training materials, notes & other relevant references.

ON-THE-JOB TASKS

Students' on-the-job tasks require them to develop various documents, service reports, and outcomes found in the industry.

Some of the required work performance evidence to complete this course is as follows:

- 10 fire extinguishers, including at least 1 of each of the following
Water, Dry chemical, Carbon Dioxide, Wet Chemical, Foam
- 5 fire blankets across 2 separate buildings

The training is structured in a logical sequence to enable a step-by-step learning process. The activities are presented in a clear manner. They are directly linked to the course and industry information, allowing assessors to ascertain that students can competently apply their knowledge and skills.

The duration of the course is flexible, with students having up to 3 months to complete it. The more time students dedicate to the online learning component and on-the-job tasks, the faster they can work through the content and assessment tasks.

To assist students in their learning journey, Axiom Compliance Learning offers the expertise of highly skilled and motivated trainers and assessors with current industry experience. These professionals create an interactive, engaging, and supportive learning environment to facilitate learning. Additionally, the student management team is readily available to assist with questions and offer support with online coursework, ensuring that students receive the necessary guidance to succeed in their studies.

COMPUTER SKILLS

Students need to be able to use common office programs such as Microsoft Word, Excel, PDF forms and Web browsers.

COURSE FEE:

\$420 no GST on accredited training

AFTER ENROLMENT Axiom Compliance Learning Training Dates

- After enrolling online, we will contact the student to discuss their suitability for training.
- Enrolment confirmation will be emailed, including the invoice.
- Following the receipt of payment, we will confirm receipt via email, including the login details to start training with the online component.
- When students have logged into our online learning platform, they can access course documentation, instructions, templates, and resources; students are ready to begin the course.
- Students will receive email, text message, and phone correspondence to schedule/confirm the training sessions.

CPPFES2020 Conduct routine inspection and testing of fire extinguishers and fire blankets

COMPLETION

Upon successfully meeting all the requirements, students will be awarded a Statement of Attainment for CPPFES2020 Conduct routine inspection and testing of fire extinguishers and fire blankets.
